The 21<sup>st</sup> Conference of the European Colloid and Interface Society (ECIS 2007) will take place September 10-14, 2007, at the International Conference Centre, Geneva, Switzerland.

The conference covers the entire field of colloid and interface science, ranging from fundamentals to applied aspects, specifically, the topics considered include properties of interfaces, colloidal particles, and surfactants, their interactions with ions, small molecules, polymers, and biomolecules, the resulting self-assembling nanostructures, aggregates, gels, or colloidal crystals. Further topics of specific interest are micelles, microemulsions, emulsions, foams, and applications of these systems in foods, cosmetics, ceramics and, with particular emphasis, on pharmaceutical applications in drug delivery and surface-based sensors. The conference further includes the relevant synthetic and analytical techniques, theory, and computer simulation.
